PROFILE

Business Analyst with hands-on experience in data analysis, reporting, and dashboard development using **SQL, Python, Power BI, Tableau, and Excel**. Skilled in transforming operational and business data into actionable insights to support decision-making and process optimization. Experienced in stakeholder coordination, reporting workflows, and cross-functional collaboration, with additional knowledge of cloud technologies, Git, and analytics tools. Strong analytical mindset with interest in **customer behavior, KPI reporting, and digital/media analytics environments**. **Currently based in Munich and open to Business Analyst and Data Analytics opportunities.**

Technical Skills

Data Analysis & Visualization: — Power BI, Tableau, Excel, Dashboard Development, KPI Reporting, Data Visualization

Data Analytics: — Data Cleaning, Exploratory Data Analysis (EDA), Reporting & Business Insights

Programming & Databases: — Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, MySQL, PostgreSQL

Tools & Platforms: — GitHub, Linux (Ubuntu), Cloud & DevOps Fundamentals

Professional Skills: — Thinking, Problem Solving, Communication, Team Collaboration, Process Optimization

EDUCATION

Bachelor of Engineering in Industrial Production, JNN College Of Engineering, India

DevOps Engineer, Panthéon SORBONNE (DataScientest / LIORA INT)

CERTIFICATIONS

DevOps Engineering Certification, DataScientest / LIORA INT

German Language Certification -B2(Course Completed), Anderwerk.de

SkillUP

- Data Science with Python
- Business Analytics
- Tableau & Power BI Training

Projects (Data Analytics & Business Intelligence)

Python – Exploratory Data Analysis (EDA) Projects 🌐, Festival Sales Analysis

- Cleaned and analyzed sales datasets using Python (Pandas, NumPy)
- Identified customer purchasing behavior and seasonal sales trends
- Created visualizations to support business insights and decision-making

Student Performance Analysis 🌐

- Performed data cleaning and exploratory data analysis on academic datasets
- Identified performance patterns and key influencing factors
- Developed visual insights using Python (Matplotlib/Seaborn)

Music Data Analysis 🌐

- Analyzed music datasets to identify popularity and listener behavior trends
- Performed data preprocessing and exploratory analysis

- Built visual reports to communicate trends and insights

Wine Dataset Analysis [↗](#)

- Conducted exploratory data analysis on wine quality datasets
- Identified correlations and patterns in product attributes
- Used Python libraries for visualization and insight generation

Power BI – Business Intelligence Dashboards [↗](#), Bank Customer Churn Dashboard

- Built interactive Power BI dashboard for customer churn analysis
- Visualized KPIs related to customer retention and behavior
- Enabled data-driven insights for improving customer retention strategies

Financial KPI Dashboard [↗](#)

- Developed financial KPI dashboards for performance tracking and reporting
- Visualized revenue, profitability, and operational metrics
- Improved clarity of business reporting through interactive dashboards
